

Jeronimo Silva

Jeronimo is a private lands biologist with the Conservation Management Institute at Virginia Tech. He received his B.S from Virginia Tech and M.S. from Tennessee State University. For the past six years, Jeronimo has been involved with hellbender research projects across the Southeast alongside local, state, and federal partners. Based out of Knoxville, TN, Jeronimo is coordinating the implementation of the

Southeastern Hellbender Conservation Initiative (SEHCI) in Tennessee. In his current role, Jeronimo works in partnership with USDA's Natural Resources Conservation Service (NRCS) to translate research into management and guide implementation of conservation practices that enhance stream ecosystems across Middle and East Tennessee.
